Innovative Waterproofing When Downtime Isn’t an Option

GacoQRSDeck
The Quick Return to Service Waterproofing System
**GacoQRSDeck** is a seamless protective membrane that adheres and cures fully in a fraction of the time required by traditional waterproofing systems. The system uses the new GacoFlex U61 two-component polyaspartic fast-cure coating along with the GacoFlex E5990 penetrating epoxy sealer, a tried and true weapon against vapor-drive and outgassing in rising temperatures.

**No time for down time?**

**GacoQRSDeck** system is a fast-cure solution for waterproofing pedestrian or auto traffic decks and getting them up and running again.

**Enhanced opportunities.**

Experienced contractors can move their business to an entirely new level with the GacoQRSDeck system.

Begin a deck on Friday and put it back into use on Monday.

Customers will be happy to save the cost of lost business during longer down-times, and contractors will be happy to make more money as they move on to the next job faster.
GacoQRSDeck
Quick return to service is its middle name.

GacoFlex E5990
Seals concrete and masonry to mitigate vapor drive resulting from high ground water table or capillary action, and also helps reduce any gas transmission that may occur during rising temperatures.

NEW GacoFlex U61
Polyspartic coating specially formulated to cure quickly.

GacoShell Granules
Wear evenly with the coating and remain embedded under pressure, keeping the system watertight long after other aggregates have “kicked out” of other decking membranes.

GacoQRSDeck System
The Quick Return to Service Waterproofing System
Gaco Western is a recognized leader in innovative silicone roofing systems, and offers best-of-class waterproofing and insulation solutions for a variety of commercial, industrial and residential applications. Founded in 1955, Gaco Western remains today a family-owned business with its roots in technology and product innovation.
