SPRAY POLYURETHANE FOAM INSULATION

Whether you are looking for insulation solutions for commercial, residential, new construction, retrofit or numerous specialty applications, Gaco Western has a spray foam insulation solution to meet your specific project requirements.

## GacoOnePass Closed Cell Foam

- Can be installed in up to 5 1/2" passes.
- R14 at 2", R21 at 3", R25 at 3.5", R29 at 4".
- 20-30% higher yields than standard 2 lb. foams when sprayed in one pass at 3-4" thickness.
- Appendix X approved for use without an additional ignition barrier.
- **UL GREENGUARD GOLD** certified.
- Reduces labor installation costs by 50% or more.
- Meets the requirement for a Class II vapor retarder at just 0.44".
- Can be used in deep fill applications with up to 18" in depth per pass for applications like trench fill, pipe erosion control, container filling, etc.

## Gaco 183M Closed Cell Foam

- 2 lb. medium-density foam with exceptional sprayability. Superior formulation provides consistent, forgiving, user friendly foam with great yields and less gun clogging.
- Winter and Summer formulations expand your spray window in colder temperatures.
- Less viscous. Reduces wear and tear on equipment.
- **ABAA** evaluated material.
- **UL GREENGUARD GOLD** certified.
- Appendix X approved for use without an additional ignition barrier.
- R6.4 at 1" and R23.3 at 3.5" (R6.67 at >3.5").

## GacoToughFoam High Density 10 lb. Spray Foam

- The first high-density 10 lb. spray foam in the industry to meet Class A (Class 1) requirements.
- Provides protection from physical damage in a wide variety of applications including poultry houses, livestock enclosures and uninhabited storage buildings.

## GacoProFill SYSTEM

1 Hour Re-entry for trades.

- Injection system behind a stapled membrane – eliminates cutting and waste.
- Reduces air-borne particulate matter in relation to typical SPF.
- Easy application without spraying. Ideal for new applicators.
- Standard SPF machine – only need a pour tip for your gun.
- Performs well in residential and commercial new construction.
- Consistent full cavity fill with smooth surface. NO trimming needed. NO waste. Precise estimates.
- Membrane comes in vapor retarder or non-vapor retarding style to fit your climate and building needs.

## GacoProFill Polyurethane Foam Insulation

- 1/2 lb. density Open Cell foam designed specifically for injection into a variety of empty cavities.
- High R-value (R4.04 at 1") and seamless air barrier help reduce energy costs by up to 40%.
- GacoProFill is both an insulation AND air barrier material – won't shrink, settle or sag.
- Performs well in residential and commercial building retrofit projects and in CMU block fill applications.
- First Open Cell foam in the United States to be awarded **UL GREENGUARD GOLD** certification.
- Excellent low temperature performance – substrate temperatures below 20°F.
- 18,000 board feet of yield.

## GacoFireStop2 Open Cell Foam

- First Open Cell foam to meet the requirements of Appendix X with no additional ignition barrier.
- Safety and savings all in one step – saves time and money by eliminating the need for a coating.
- High yielding for all job applications.
- 1/2 lb. density Open Cell foam with above average R-values of R4.1 at 1", R14 at 3.5", R22 at 5.5", R30 at 7.6", R38 at 9.6".
- Easily recognizable salmon color – easy for code officials to inspect and pass.
- Great product for attic retro projects.
- Low odor. Easy to trim.

## Gaco 052N Open Cell Foam

- Suitable for a wide range of residential, commercial and industrial applications including: walls, ceilings, floors, attics and crawlspaces.
- Flat spraying and consistent 1/2 lb. foam with good adhesion and yield.
- Low odor. No mixing required.
- Class 1 fire rated.
- High R-value for high returns (R12 at 3", R14 at 3.5", R16 at 4", R22 at 5.5").

Our commitment doesn't stop at providing excellent products. Gaco provides technical support for every step of your project.

## What can our Technical Support Team do for you?

### Get you up and running when you are down.

No one wants to experience equipment down time. Our support team is able to troubleshoot over the phone and get you up and running again.

### Provide training on our chemicals and processes.

Chemicals have their own personalities and idiosyncrasies. Our technicians will train you over the phone or on site, depending on what you need. This includes spray techniques, equipment operation and maintenance.

### Make your job easier.

We can help you any way you need – from providing tips for planning a job, to estimating, to maintenance, to training new applicators. We are happy to pass on our accumulated knowledge every step of the way.

### Take your knowledge to a higher level – GacoUniversity.

The mission of GacoUniversity is to provide high-quality technical education and training that enhances the performance of Gaco contractors and the services you provide. Through GacoUniversity, we can help you achieve SPFA Professional Certification by providing a variety of certification preparation, training and testing services including a combination of on-line courses, regional reviews and testing, and New Applicator Schools.

Gaco Western provides full-service solutions to enhance the spray foam insulation world. For more information, visit us at [gaco.com](http://gaco.com).
