

GacoFlex™ E5691

WATER REDUCIBLE EPOXY SEALER / PRIMER

Next generation GacoFlex E5691 epoxy seals and primes concrete decks in a single step prior to the application of GacoFlex coating systems. This three-component penetrating sealer and primer is specifically formulated for use on concrete surfaces, but may also be applied to plywood. Install as directed on Gaco's Product Data Sheet.

Single Step Application to Enhance Productivity

GacoFlex E5691 can help save you time by sealing and priming in a single step.

Excellent Adhesion

Designed for maximum adhesion to concrete and plywood and improves adhesion of GacoFlex coatings.

Concrete Curing*

Meets ASTM C309 requirements for use as a concrete curing compound.

Easy Clean Up

Cleans up quickly with soap and water when done so promptly.

Low VOC

GacoFlex E5691 exhibits low VOC properties.

* The minimum cure time of E5691 when used as a concrete curing agent prior to the application of GacoFlex coating systems is being tested. Not intended for application to green concrete to prepare for the installation of a conventional roofing system.
